PERSONAL PROJECTS

Realtime Chat Application

- A real-time chat application is a software program designed to facilitate communication between users in real-time, typically over the internet.
- The application usually requires users to log in through google to an existing account to access the chat functionality.
- The application typically has a user interface that allows users to see their contacts, and chat history, and send and receive messages.

Random Quick App

- Designed and developed a responsive quiz application using HTML, CSS, and JavaScript.
- Integrated external APIs for dynamic question retrieval, enriching the user experience with varied content.
- Implemented interactive features such as random question generation, user scoring, and progress tracking to engage users effectively.

Tic Tac Toe Game

- A Tic-Tac-Toe game application is a software program that allows users to play the classic game of Tic-Tac-Toe on their computer.
- The game is played on a 3x3 grid, and the objective is to place three X's or O's in a row, either horizontally, vertically, or diagonally.
- The application typically has a user interface that displays the game board, along with buttons or menus for starting a new game, resetting the board, and exiting the game.

ACHIEVEMENTS

Five Star at Hacker-Rank (2022)

from Hacker-Rank

Runner-up in Chess (2020)

from School of Management Sciences, Varanasi
